

ALBA GARZA

- SOFTWARE ENGINEER -

ABOUT ME

Creative and adaptable Software Engineer with 3+ years of full-stack experience, specializing in frontend engineering and UI/UX leadership. Experienced in owning end-to-end frontend architecture, collaborating cross-functionally, and translating complex systems into intuitive user experiences. Currently pursuing a Master's in Applied Artificial Intelligence, expanding into AI-driven products and data-informed design.

SKILLS

Frontend: JavaScript, TypeScript, React, CSS, React Native, Angular, TailwindCSS, Framer Motion, Chakra UI, Storybook
Backend: Java, Spring Boot, Python, PostgreSQL, Node.js, Go
Cloud & DevOps: AWS, Docker, Jenkins, CI/CD, Git
Testing: Jest, Cypress, JUnit
Other Tools: Jira, Asana, Confluence, Postman, Figma Web dev: SquareSpace, Shopify, WordPress
Code Editors and AI: VS Code, Cursor, Chatgpt, Gemini, Claude

EDUCATION

2024 - 2025 | INESEM Business School
Master's of Applied Artificial Intelligence
2019 - 2023 | UVM
Bachelor of Computer Engineering

LANGUAGES

- English, Spanish

EXPERIENCE

November 2025 - Present at Towa - EasyBee AI

Stack: React, TypeScript, JavaScript, CSS, Tailwind CSS, FAST API, PostgreSQL

Software Engineer Frontend - Lead

- Owned the frontend architecture and UI/UX direction for AI agent products, acting as the primary decision-maker for workflows and interface design
- Led frontend development and partnered with UI/UX designers to review, approve, and refine designs for usability, scalability, and consistency
- Took ownership of key initiatives, including analytics dashboards for tracking AI agent performance and usage
- Translated complex AI system data into clear, actionable user experiences, collaborating cross-functionally and leading stakeholder demos. Used tools like cursor for faster development.

October 2024-August 2025 at Medallia

Stack: React, TypeScript, JavaScript, HTML, SCSS, Java, SpringBoot, PostgreSQL

Software Engineer II

- Maintained and enhanced scalable, WCAG-compliant survey applications in a monorepo environment using React and TypeScript
- Developed and maintained the Chrome Extension UI and internal configuration tool, improving efficiency for account managers managing client setups
- Migrated and optimized authentication workflows, supporting both predefined and generic configurations (e.g., Okta)
- Investigated complex frontend issues that exposed backend and API problems, collaborating across teams to improve system stability
- Contributed to the migration from Angular to React, improving maintainability and reducing build complexity

October 2022 - October 2024 at Encora - Imagine Learning

Stack: React, TypeScript, JavaScript, SCSS, Java, Spring Boot, PostgreSQL

Software Engineer

- Developed interactive e-learning features including passages, assessments, and follow-up questions
- Integrated frontend components with REST APIs in a microservices architecture
- Implemented responsive and accessible UI features, improving performance and WCAG compliance
- Diagnosed and resolved production issues; collaborated with QA to validate fixes
- Contributed to CI/CD pipelines and wrote unit and E2E tests using Jest and Cypress

March 2022 - September 2022

Stack: React, TypeScript, JavaScript, HTML, CSS, Java, SpringBoot, PostgreSQL, Go

Software Engineer Intern

- Supported internal tool development using React, Java, and PostgreSQL
- Built modular, reusable frontend components to improve UI consistency
- Collaborated in Agile teams, strengthening API integration and version control practices
